

Advancements in Breast Cancer

Learn about the most recent developments in breast cancer research and treatment directly from the physicians at Compass Oncology.

You will hear a review of the latest information presented at the **San Antonio Breast Cancer Symposium**, the largest international breast cancer conference. Topics include:

- **Jay Andersen, MD:**
Optimal Duration of Adjuvant Anti-Hormone Therapy
- **Tammy De La Melena, MD:**
"How close, is close?"
- **Lucy Langer, MD:**
What's New In Triple Negative Breast Cancer

Jay Andersen, MD
Medical Oncologist

Dr. Andersen is a medical oncologist and Co-Director of Compass Breast Specialists. He has advanced subspecialty expertise in breast cancer, gastrointestinal and lung cancers. Because he believes better outcomes are achieved when patients understand and embrace their care, his practice philosophy is education-based and very collaborative.

Tammy De La Melena, MD
Breast Surgical Oncologist

Dr. De La Melena specializes in the surgical management of breast cancer and benign breast disease. Her practice philosophy hinges on the belief that the best breast cancer care is a partnership and team effort between patient, surgeon, nurses and physicians from different oncology specialties.

Lucy Langer, MD
Medical Oncologist

Dr. Langer is a medical oncologist, Director of Compass Oncology's Genetic Risk Evaluation and Testing (GREAT) program, and Medical Director of Cancer Genetics for US Oncology. In addition to over 15 years experience in genetic research, she has advanced subspecialty expertise in breast cancer.
